Owingsville house, L. R. Slesser to

Estill and James R. Day to the

was a success in all respects.

vember; Wilburn Berry sold 36 to

Broke the arm.—A seven-year-
old son of Frank Jones, who works
for Keeper Jo Williams at the Poor-
house farm, fell out of a tree Sun-
day and broke his arm at the elbow.
Dr. Giddell set the fracture.

holding a very successful meeting

prospects are good for large number
before they close. Seven hundred
people attended the meeting Sun-
day.

FATAL WHOOPING COUGH.—A fa-
tal epidemic of whooping cough
is raging among the colored chil-
dren in town. Thomas Foley and
Trevin Hurt each lost a young
child by it Sunday night. Five
have died of the same disease re-
cently.

THE QUAKERS.—The street con-
cert every night of the Quaker
medicine company attracts very
large crowds. Their two musical

promises to be an elaborate and in-
teresting affair.

UNCLE GEORGE JACKSON'S DEATH.—
George Jackson, Sr., died, at his
home near Olympia, on Aug. 26th.
He was aged 86 years. He was
sick when he had lived in wedlock
for 62 years, died two weeks pre-
vious, and they were buried side
by side at the family cemetery.
She was aged 85 years. Her maid-
en name was Melissa Barber. She
was a daughter of Thomas Bar-
ber, and a sister of Mrs. Thomas
Barber.

fire. They ran and broke in the
door and rescued some small chil-
dren that had been locked in and
left by the mother while she went
away on some errand. She had left
a lamp without any chimney burning,
and it is supposed that the lamp
exploded or otherwise started the
fire. The alarm quickly brought the
fire engine and brigade on the
scene. It looked then like a hope-
less task to attempt to extinguish
the flames, but a well was close by
and the fire was quickly extinguished
when the engine got to work.
All the household goods were saved.
There was no insurance. The
house is a wooden double dwelling
11 stories high. The roof, upstairs
floor and part of the weather-board-
ing were consumed, but the house
can be patched and made to serve
yet. There is no doubt about the
engine being a good thing, and the
Council's wisdom in buying is
amply vindicated.

Tobacco Report.—Expressing
the Tobacco Report, at J. S. Phillips
& Co., Planters Warehouse, Loui-
sville, Ky., Aug. 29, 1896, this
week, the first time for a long while,
we can report a better and stronger
demand for Burley tobacco. The
manufacturers were showing more
interest and taking hold again, and
the foreign buyers also bought
more freely. The grades most
affected and showing an advance
were tips, leaf and lugs, and indeed
all grades ruling heretofore at from
2 up to 4 1/2. All real bright to-
bacco, of every grade, are in strong
request. But we must remind our
friends that while the absolute neces-
saries of life are so very low we
cannot expect tobacco to be high,
but must look for it to share alike
with other things the general de-
pression of values. Reports say
that in some localities the 36 crop
is better, while in other sections
it is worse than last year.

Oh, how sweet it will be in that
beautiful land so free from all sor-
row and pain, to meet their mother
again! May the bereaved husband
and children, with many other
loved ones, so live that they may
all enter into that rest that remains
for the children of God.

"A precious one from us is gone:
A voice we loved is stilled;
A place is vacant in our home
Which never can be filled."

Dearest mother then hasten on:
Anchored safe where storms are
over.

On the border land we left her,
Soon to meet to part no more.

When we leave this world of care,
We shall find our missing loved one
In our Father's mansion fair.

May the God of mercy and grace
sustain them. R. A. H.

Flood. There is some heavy work,

pany. The trestling is better than

They are making a first-class road

Mr. Editor: You presented your
case fairly as to the millionaire
farmer and laborer, but you failed
to show a single millionaire farmer.
As to the laborer you cite several
cases where men commenced low
and succeeded by the fertility of
their brains. Too many instances
of that kind; that's where the
trouble is; too much fertile brains
for the growth of the plain common
people, for it is an admitted fact
when you make one millionaire you
make ten thousand poor people.
A few instances of pros-
perity; you fail to cite the
cases of farmers in

honestly gone into debt expecting
prices to continue as they were, and
pay out; but when you cut down
prices by the contraction of the
money volume it wrecks thousands
of honest debtors. As to arraying
the masses against classes the class-
es have already done that by their
own acts.
